

# G SLEEVE®

Proud 1<sup>st</sup> Place Patient & Staff Safety Winner in "Surgical Products"

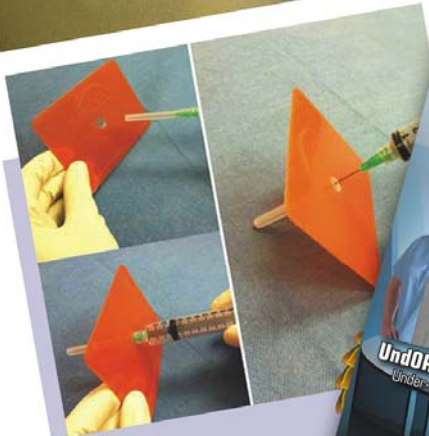

### G-Sleeve

Patient Safety Gear, Inc. has introduced the G-sleeve, designed to eliminate the risk of potential injury when treating mastectomy and lumpectomy with lymph node removal and dialysis. The G-sleeve is an alerting tool used to signal that there is to be no blood draws, blood pressure or intravenous on the patient, post-operatively as well as on the surgical floor.

### ReCap-It

The Ansell Sandel Medical Solutions LLC ReCap-It™ was designed to help prevent accidental needlesticks and provide healthcare professionals with a safe way to recap using a one-handed technique. The ReCap-It is a simple, safe alternative to the "scoop" method. The ReCap-It is an addition to the SANDEL Engineered Sharps Injury Prevention line.
